PERSONAL PROJECTS

Personal Portfolio

- <https://vishwajeet28.github.io/vishwajeetsingh>
- Personal resume site using HTML, CSS, JavaScript for displaying all the credentials of a resume with an innovative displaying style. It covers the need of a resume and also look smart and saves the user of always carrying a hardcopy of the resume.

Flight Deal Finder

- This Python app will help you to find cheap roundtrips flights, especially if you have flexible dates of travel. Since airlines change ticket prices throughout the week, leaving this running will allow you to wait until prices drop under a certain threshold before booking.

Weather API

- This python app will collect weather information such as current temperature, pressure, humidity, wind speed, weather description and many others, of any place on the earth. sing Python API You can find these weather information in real time by just typing the city name.

Black Jack Game

- This python project Blackjack is a card-based game played at casinos. The participants in this game do not compete with each other but the dealer assigned by the casino. n this we create the Blackjack game between a player and a dealer from scratch, that can be played on the terminal
